IT DISASTER RECOVERY TECHNOLOGIES

IT Disaster Recovery (ITDR) has become the catch-phrase of technology and services companies over the last few years; forming the backbone of many business continuity strategies.

Vendor solutions to meet ITDR needs have developed rapidly over the last few years, and fit many different categories: extending from basic tape and disk backup technologies through to high-availability data centre solutions, data mirroring and virtualisation. Due the complex and varied scope of ITDR requirements, almost any company can justify their inclusion to the list of suppliers.

This has become a headache for many CIO's and IT Managers interested in integrating effective solutions into their already complicated networks. OpsCentre has worked with the vendors for many years, and have helped our clients to evaluate, select and implement most of the technologies included in this report. Yes, we have actually seen many products that do in fact deliver on the marketing promise.

This report profiles a selection of technology vendors that provide effective solutions to meet various IT Disaster Recovery needs; we hope that this list may save you some precious time in your next search for Disaster Recovery products and services.

As we continue to research products of this nature, we will revise and reissue this report. Feel free to contact me personally if you have suggestions for future inclusions.

NETWORK INFRASTRUCTURE DISASTER RECOVERY

Product Name	Brocade SilkWorm SAN Routers
Website	www.brocade.com/products/multiprotocolrouter.jsp
Item	Details
Company Profile	Brocade is an industry leader in data center networking solutions and services that enable organizations to manage their most vital information assets. Global 500 companies rely on Brocade technology to keep their businesses running around the clock.
Product Overview	Manage failover between remotely located and/or differing types of SANs.
Infrastructure Platform	<ul style="list-style-type: none"> • DCX Backbone • Directors • Switches • Fabric Extension and Routing • Fabric Management Software • Fabric applications • File Management • Server Connectivity • Bladed Server SANs • Technology and Architecture
Licensing/Cost Details	http://www.brocade.com/products/licensekeys.jsp
Dependencies	Varies per product
Company location	International: http://www.brocade.com/company_info/locations.jsp
Support Details	http://www.brocade.com/support/index.jsp
Service and Upgrade Details	http://www.brocade.com/services/index.jsp

Product Name	McData Eclipse
Website	http://www.brocade.com/index.jsp
Item	Details
Company Profile	Merged with Brocade on August 6 th , 2006 to complete with Cisco
Product Overview	For IPS families of multiprotocol SAN switches - manage failover between remotely located and/or differing types of SANs.

SERVER INFRASTRUCTURE DISASTER RECOVERY

Product Name	HP Virtual Server Environment for HP-UX 11i
Website	http://h20338.www2.hp.com/enterprise/cache/258348-0-0-0-121.html
Item	Details
Company Profile	Hewlett Packard
Product Overview	Aimed at servers and blade servers; is one of the many tools HP offers for virtualizing servers.
Infrastructure Platform	<ul style="list-style-type: none"> • HP Integrity and HP 9000 Servers
Licensing/Cost Details	http://welcome.hp.com/country/us/en/howtobuy.html
Company location	International
Support Details	http://welcome.hp.com/country/us/en/contact_us.html

Product Name	Topspin Communications Topspin 360 server switch
Website	http://www.topspin.qassociates.co.uk/solutions-server-virtualization.htm
Item	Details
Company Profile	VFrame is the industry's first truly open solution for utility computing. With this software suite and Topspin switches, data center managers can build their own utility computing data center out of industry-standard servers, storage, applications, and management tools. VFrame seamlessly integrates these components across Topspin's standards-based server switching infrastructure.
Product Overview	Creates virtualized clusters between servers of any operating system (even those running VMware) and/or between SANs for automatic failover, load balancing and the like. Useful for sites wanting to virtualize non-Windows servers.
Licensing/Cost Details	http://www.topspin.qassociates.co.uk/quotes-index.htm
Company location	Q Associates Langley Business Court, Beedon, Newbury, Berkshire, RG20 8RY, UK. E-mail: info@qassociates.co.uk Tel: +44 (0)1635 248 181 Fax: +44 (0)1635 247 616
Service and Upgrade Details	http://www.qassociates.co.uk/services-solutions/index.htm

OPERATING SYSTEM DISASTER RECOVERY

Product Name	BakBone - VaultDR
Website	http://www.b2net.co.uk/bakbone/bakbone_vaultdr_plugin.htm
Item	Details
Company Profile	B2net Ltd is a vendor-independent storage integrator, with extensive experience in designing and deploying enterprise server and storage solutions.
Product Overview	<p>BakBone NetVault VaultDR Plugin Module allows quick recovery in the event of a disaster, allowing supported NetVault clients to be recovered without reinstallation of operating systems.</p> <ul style="list-style-type: none"> • Server and Storage Consolidation • Storage Virtualisation • Information Lifecycle Management • Enterprise backup and recovery • Storage Area Networks • Network Attached Storage
Infrastructure Platform	<ul style="list-style-type: none"> • NetApp • SUN • UBM • Oracle • HP • EMC • Fujitsu Siemens • Cisco
Company location	<p>Head Office Address: b2net Ltd, Grayson House, Venture Way, Dunston Technology Park, Dunston Road, Chesterfield, S41 8NE UK</p>
Support Details	http://www.b2net.co.uk/support/

Microsoft

Product Name	Microsoft Virtual Server 2005
Website	http://www.microsoft.com/windowsserversystem/virtualserver/default.aspx
Item	Details
Company Profile	Microsoft
Product Overview	Supports virtualization of Windows 2000 servers.
Infrastructure Platform	X86
OS Platform	Windows
Licensing/Cost Details	Free download
Company location	International
Support Details	http://technet.microsoft.com/en-au/ms772425.aspx

SUN

Product Name	Solaris 10
Website	http://www.sun.com/software/solaris/10/index.jsp
Item	Details
Company Profile	http://www.sun.com/index.xml
Product Overview	The Solaris Operating System—supported on over 1000 x86 and SPARC platforms—delivers the performance, stability and security your users and customers demand. With more applications available than for any other open operating system, one OS can span your entire enterprise: the Web tier, the data warehouse, and the most demanding technical compute applications.
Infrastructure Platform	<ul style="list-style-type: none"> x86 and SPARC
OS Platform	Sun Solaris 10
Licensing/Cost Details	Free
Company location	International
Support Details	http://www.sun.com/support/index.jsp
Service and Upgrade Details	Web upgrades only

Product Name	Solaris 10 N1 Grid Containers
Website	http://www.sun.com/2004-0330/feature/index.html
Item	Details
Product Overview	<p>Partitions Sun boxes so that they can run multiple instances of Solaris, even older and new versions simultaneously.</p> <p>The technology is called N1 Grid Containers, and it is designed to increase utilization of your hardware resources and boost your server-to-administrator ratio. With the N1 Grid Containers technology, you can create up to 4000 secure, fault-isolated software partitions (or containers), each with its own IP address, memory space, file area, host name, and root password.</p>
Infrastructure Platform	<ul style="list-style-type: none"> The N1 Grid Containers technology will be available for all Sun server platforms, including UltraSPARC processor-based and x86-based systems with 32-bit Xeon and 64-bit Opteron architectures.

Product Name	Sun StorEdge Traffic Manager software
Website	http://docs.sun.com/app/docs/doc/817-3674-12
Item	Details
Product Overview	<p>Provides automatic failover, load balancing and the like even between Sun servers in remote locations; can prioritize traffic from applications that cannot sustain delays.</p>

Virtualisation (VMware)

Product Name	
Website	
Item	Details
Company Profile	
Product Overview	Microsoft Windows Server 2008 includes new features that provide significant improvements for managing clusters in multi-site architectures. For example, Windows Server 2008 Failover Clustering removes the dependency of having all cluster nodes on the same subnet. However, improvements to Failover Clustering do not yet provide a way to replicate the shared data used by a cluster which is truly the "last mile" in terms of building multi-site cluster architectures. GeoCluster provides a way to efficiently replicate these data changes and allow cluster nodes to quickly restore application services after a failure. Together, Windows Server 2008 Failover Clustering and GeoCluster from Double-Take Software provide the ultimate geographically-distributed application recoverability solution for clustered applications.
Infrastructure Platform	<ul style="list-style-type: none"> X86
Licensing/Cost Details	Windows Linux
Company location	Double-Take uses a single product which can protect Exchange, SQL, File, print server, etc with the same license can be used to protect any one of them. This protects your investment as you can move your license across the several servers you want to protect freely as needed as licenses are not tied to the application it protects.
Support Details	International

Product Name	VMware ESX Server
Website	http://www.vmware.com/products/vi/esx/
Item	Details
Company Profile	http://www.vmware.com/
Product Overview	VMware ESX is a "bare-metal" hypervisor that partitions physical servers in multiple virtual machines. Each virtual machine represents a complete

	system, with processors, memory, networking, storage and BIOS.
Infrastructure Platform	<ul style="list-style-type: none"> X86
Licensing/Cost Details	http://www.vmware.com/vmwarestore/
Company location	International
Support Details	http://www.vmware.com/support/

Product Name	VMware P2V Assistant
Website	http://www.vmware.com/products/converter/
Item	Details
Product Overview	Eases conversion of physical servers onto virtual servers; can be helpful if moving from failed physical servers to back-up virtual servers.
Infrastructure Platform	<ul style="list-style-type: none"> X86
Licensing/Cost Details	http://www.vmware.com/vmwarestore/
Company location	International
Support Details	http://www.vmware.com/support/

Product Name	VMware VMotion
Website	http://www.vmware.com/products/vi/vc/
Item	Details
Product Overview	Takes an image of a VMware ESX or GSX virtual server for porting to another server running VMware virtualization software; intended for scheduled maintenance, not automatic failover from disasters.
Infrastructure Platform	<ul style="list-style-type: none">• X86
Licensing/Cost Details	http://www.vmware.com/vmwarestore/
Company location	International
Support Details	http://www.vmware.com/support/

DR SOFTWARE SOLUTIONS

Product Name	XOsoft
Website	http://www.xosoft.com/
Item	Details
Company Profile	CA is one of the world's largest IT management software providers. Our software and expertise unify and simplify complex IT environments—in a secure way—across the enterprise for greater business results.
Product Overview	Business continuity, high availability and continuous data protection solutions to support disaster recovery and data recovery software planning needs
Infrastructure Platform	x86
OS Platform	Windows Microsoft Virtual Server IBM AIX Sun Solaris Red Hat Enterprise Novell SUSE Linux Enterprise VMware virtualization products
Licensing/Cost Details	XOsoft has a different product for each application it protects, which means if you are buying license to protect file & print server today then you got rid of your file & print server and want license to protect your Exchange you would need to purchase a new one,
Company location	International
Support Details	http://www.ca.com/us/technical-support.aspx

Product Name	Double-Take
Website	http://www.doubletake.com/
Item	Details
Product Overview	Software products and services enable customers to protect and recover business-critical data and applications to support disaster recovery, high availability and centralized backup. We provide solutions that make recovery easy for Exchange, SQL, Virtual Systems, Oracle and more.
Infrastructure Platform	X86
OS Platform	Windows Linux

Licensing/Cost Details	Double-Take uses a single product which can protect Exchange, SQL, File, print server, etc with the same license can be used to protect any one of them. This protects your investment as you can move your license across the several servers you want to protect freely as needed as licenses are not tied to the application it protects.
Company location	International
Support Details	http://www.doubletake.com/support/

Product Name	PlateSpin
Website	http://www.platespin.com/
Item	Details
Company Profile	PlateSpin and Novell are helping organizations worldwide build more flexible, interoperable and cost-effective data center environments. The combination of PlateSpin and Novell products offers customers a powerful data center management platform with solutions for Linux, UNIX and Windows across physical and virtual environments. The global reach of the combined companies allows us to offer enterprises a full range of integrated solutions to make their IT work as one.
Product Overview	Convert to VMware ESX Server, VMware GSX Server or Microsoft Virtual Server automatically.
Infrastructure Platform	X86
OS Platform	Windows Red Hat Linux SUSE Linux
Licensing/Cost Details	http://www.platespin.com/support/program.aspx
Company location	International
Support Details	http://www.platespin.com/support/overview.aspx

Product Name	Neverfail
Website	http://www.neverfailgroup.com/
Item	Details
Product Overview	Neverfail's Continuous Availability approach detects application failures and IT outages before recovery is required, and automatically switches the business to other servers to avoid business downtime
Infrastructure Platform	X86
OS Platform	Windows
Company location	International
Support Details	http://www.neverfailgroup.com/services/technical-support.aspx

Product Name	Sonasoftware
Website	http://www.sonasoftware.com/
Item	Details
Company Profile	Sonasoftware was founded in 2002 for the purpose of providing software-based solutions that simplify and automate the process of database backup and recovery, centralize the management of multiple servers, and cost-effectively provide a disaster recovery strategy to protect valuable data. The result is higher availability of computer-based information, reduced risk of accidental or deliberate data loss, lower IT costs, and a sound disaster recovery strategy.
Product Overview	Providing software-based solutions that simplify and automate the process of database backup and recovery, centralize the management of multiple servers, and cost-effectively provide a disaster recovery strategy to protect valuable data.
Infrastructure Platform	X86
OS Platform	Windows
Licensing/Cost Details	http://www.sonasoftware.com/contact/sales.asp
Company location	US - California
Support Details	http://www.sonasoftware.com/support/services.asp

Product Name	Acronis
Website	http://www.acronis.com.au/
Item	Details
Company Profile	A global company, Acronis has offices in the United States, Europe and Asia and sells its products both direct and through enterprise resellers. Acronis is a world leader in providing advanced, scalable storage management and disaster recovery software
Product Overview	An enterprise-class solution to backup Windows and Linux servers and restore them to the same or different hardware, including to virtual servers. Direct output to virtual file formats, VMware Consolidated Backup, advanced management capabilities and more.
Infrastructure Platform	X86
OS Platform	Windows Linux
Licensing/Cost Details	http://www.acronis.com.au/company/contacts/?s=OEMRequest
Company location	Australia and International
Support Details	http://www.acronis.com.au/enterprise/support/

BACKUP AND RECOVERY

Product Name	Symantec – Veritas Replication-Exec
Website	http://www.symantec.com/business/replication-exec
Item	Details
Company Profile	Symantec
Product Overview	Helps organizations ensure continuous, round-the-clock protection of Microsoft SQL and Exchange applications.
Infrastructure Platform	X86
OS Platform	Windows
Licensing/Cost Details	http://www.symantec.com/business/products/licensing/index.jsp
Company location	International
Support Details	http://www.symantec.com/business/support/support_policies.jsp

Product Name	Ultrabac
Website	http://www.ultrabac.com/
Item	Details
Company Profile	UltraBac Software (BEI Corporation) is headquartered in Bellevue, Washington, USA, just minutes away from Microsoft's main campus. Founded in 1982, the company has focused on leading-edge development of high performance utility applications. Privately held, the company has been self-funded and profitable every year.
Product Overview	UltraBac Software delivers fast, easy-to-use backup and disaster recovery software for the protection of your business systems
Infrastructure Platform	Most tape vendors
Licensing/Cost Details	http://www.ultrabac.com/products/65how-to-purchase/
Company location	US
Support Details	http://www.ultrabac.com/techsupport/

Product Name	StorageCraft
Website	http://www.storagecraft.com/Company/AboutStorageCraft/
Item	Details
Company Profile	Located in Draper, Utah and founded in 2003, StorageCraft Technology Corporation is focused on providing innovative disk-based backup, disaster recovery, data protection, migration and security solutions for servers, desktops and laptops. Our main objective is to provide products that can reduce downtime, improve business continuity and lower the Total Cost of Ownership (TCO) for systems in your environment.
Product Overview	Focused on providing innovative disk-based backup, disaster recovery, data protection, migration and security solutions for servers, desktops and laptops.
Infrastructure Platform	X86
OS Platform	Windows
Licensing/Cost Details	http://store.storagecraft.com/acb/stores/1/
Company location	US
Support Details	http://forum.storagecraft.com/Community/web2case/

Product Name	EMC – Backup and Recovery
Website	http://www.emc.com/solutions/business-need/backup-recovery-archiving/backup-recovery.htm
Item	Details
Company Profile	EMC
Product Overview	Disk-based disaster recovery and data backup and storage application. Supports Oracle databases.
Infrastructure Platform	X86
OS Platform	IBM DB2 Windows Oracle SAP
Licensing/Cost Details	http://www.emc.com/support-training/support/purchase-renew-upgrade.htm
Company location	International
Support Details	http://www.emc.com/support-training/support/maintenance-tech-support/index.htm

Product Name	Quantum
Website	http://www.quantum.com/
Item	Details
Company Profile	As the leading global specialist in backup, recovery and archive for more than 27 years, Quantum has been focused on helping IT departments address data protection and data retention challenges by incorporating innovative solution sets with world-class service and support.
Product Overview	Backup, recovery, and archive solution that features an intuitive graphical interface along with centralized job management and reporting options.
Infrastructure Platform	http://www.quantum.com/ServiceandSupport/CompatibilityGuides/Index.aspx
OS Platform	http://www.quantum.com/ServiceandSupport/CompatibilityGuides/Index.aspx
Licensing/Cost Details	http://www.quantum.com/Wheretobuy/Index.aspx
Company location	International
Support Details	http://www.quantum.com/ServiceandSupport/Index.aspx

Product Name	LockStep Systems
Website	http://www.lockstep.com/
Item	Details
Product Overview	Backup for Workgroups 1.0 - Disk-based, client/server automatic backup and disaster recovery software utility for Windows workgroups of three or more.
Infrastructure Platform	X86
OS Platform	Windows
Licensing/Cost Details	http://www.lockstep.com/ordering/index.html
Company location	US
Support Details	http://www.lockstep.com/support/support.html

Product Name	Software Pursuits, Inc
Website	http://www.spursuits.com/
Item	Details
Company Profile	Software Pursuits, Inc. (SPI) has been providing innovative software and expert support since 1975, maintaining a focus to provide customers flexible and easy to use software for complex computing tasks.
Product Overview	BootBack - Offers a first line of defense to protect Windows servers and workstations from threats such as operating system failures, faulty upgrades, application failures and even virus attacks.
OS Platform	Windows Unix Linux Netware
Licensing/Cost Details	http://www.spursuits.com/requestPricingSureSync.asp
Company location	US
Support Details	http://www.spursuits.com/support.asp

Product Name	CDB Software
Website	http://www.cdbsoftware.com/
Item	Details
Product Overview	CDB/ADrec Disaster Recovery - Automates the recovery of DB2 subsystems and objects. Also provides auditing capabilities.
Company location	International
Support Details	http://support.cdbsoftware.com/login.aspx?ReturnUrl=%2fprivate%2fmain.aspx

DATABASE REPLICATION AND DATA RECOVERY SOFTWARE

Product Name	FalconStor
Website	http://www.falconstor.com/en/index.cfm?CFID=3980838&CFTOKEN=29363830
Item	Details
Product Overview	Replicates mission-critical information between two data centers or remote offices and data centers via database-aware, transaction-based remote replication or asynchronous and synchronous mirroring.
Infrastructure Platform	Disk based data protection
Company location	International
Support Details	http://www.falconstor.com/en/pages/?pn=Support

Product Name	EASEUS
Website	http://www.easeus.com/
Item	Details
Product Overview	Data Recovery Wizard Professional - Non-destructive and read-only file undelete tool and data recovery utility.
Infrastructure Platform	X86
OS Platform	Windows Linux
Licensing/Cost Details	http://www.easeus.com/buynow.htm
Company location	China
Support Details	http://www.easeus.com/support.htm

Product Name	Thoroughbred Software - DataSafeGuard
Website	http://www.thoroughbredsoftware.com/
Item	Details
Product Overview	Provides real-time disaster recovery, system analysis, security and replication services for your data or digitized documents. Also aids in the compliance concerns among public companies.
Databases Supported	Oracle SQL Thoroughbred
Licensing/Cost Details	http://www.thoroughbredsoftware.com/b_spo.php
Company location	International
Support Details	http://www.thoroughbredsoftware.com/b_support.php

Product Name	QueTek
Website	http://www.quetek.com/
Item	Details
Product Overview	File Scavenger -File undelete and disk data recovery application for Windows.
Infrastructure Platform	X86
OS Platform	Windows
Licensing/Cost Details	http://www.quetek.com/products3.htm
Company location	US
Support Details	http://www.quetek.com/support2.htm

Product Name	File-Saver
Website	http://www.file-saver.com/undelete/
Item	Details
Product Overview	File-Saver -"Undelete tool" that can instantly restore hundreds of deleted files in a matter of seconds - regardless of their deletion from the recycle bin.
Infrastructure Platform	X86
OS Platform	Windows
Licensing/Cost Details	https://usd.swreg.org/cgi-bin/s.cgi?r=1&s=30253&db_key=28951601&x=0&lang=&lnk=
Support Details	http://www.file-saver.com/undelete/faq.aspx

Product Name	Runtime Software - GetDataBack
Website	http://www.runtime.org/
Item	Details
Product Overview	Powerful yet easy to use data recovery application that not only undeletes accidentally deleted files or partitions but also offers a range of file system utilities and forensic tools.
Infrastructure Platform	X86
OS Platform	Windows
Licensing/Cost Details	http://www.runtime.org/buy_now.htm
Company location	International
Support Details	http://www.runtime.org/buy_now.htm

Product Name	Oracle - Oracle Data Guard
Website	http://www.oracle.com/technology/deploy/availability/htdocs/DataGuardOverview.html
Item	Details
Company Profile	Oracle
Product Overview	Management, monitoring, and automation software infrastructure that creates, maintains, and monitors one or more standby databases to protect enterprise data from failures, disasters, errors, and corruptions.
Company location	International
Support Details	http://www.oracle.com/technology/documentation/index.html

DISASTER RECOVERY PROACTIVE MONITORING SOFTWARE

Product Name	RecoverGuard
Website	http://continuitysoftware.com/products.html
Item	Details
Company Profile	Continuity Software was founded in early 2005 by a team of experienced IT and Data Protection professionals, with a passion for building innovative enterprise software solutions.
Product Overview	An agentless enterprise monitoring software solution that constantly scans your IT infrastructure, including storage, database, servers and replications configurations, and detects Data Protection risks, Disaster Recovery risks and infrastructure vulnerabilities in your system.
OS Platform	Windows 200X HP-UX Sun Solaris Linux Red Hat
Company location	International
Support Details	http://continuitysoftware.com/support.html

FILE PROTECTION AND RECOVERY SOLUTIONS

Product Name	BinaryBiz
Website	http://www.binarybiz.com/vlab/windows.html
Item	Details
Product Overview	Non-invasive utility for remote hard drive repair. Repairs a failed hard disk drive for you to recover data without the need of sending the disk in for professional data recovery service.
OS Platform	Windows MAC
Licensing/Cost Details	http://www.binarybiz.com/support/
Support Details	http://www.binarybiz.com/support/

WORKSTATION DISASTER RECOVERY

Product Name	LSoft Technologies
Website	http://www.lsoft.net/index.html
Item	Details
Product Overview	Suite of DR products for workstations and Laptops. Hard drive recovery software for DOS and Windows (Console). Recovers deleted files and folders on FAT12, FAT16, FAT32 and NTFS systems.
Infrastructure Platform	X86
OS Platform	Windows
Company location	Canada

INTELLIGENT NOTIFICATION SYSTEMS

Product Name	MIR3
Website	http://www.mir3.com/
Item	Details
Product Overview	MIR3 products are true, enterprise-level communication solutions for general business, disaster recovery, business continuity, information technology and continuous information availability across an organization.
Infrastructure Platform	Telephone messaging systems
Company location	International

APPENDIX A: ABOUT OPSCENTRE

OpsCentre is a management consultancy specialising in:

- Business Continuity Management
- IT Disaster Recovery
- Emergency Management
- Crisis Management
- Security Management

Our client base spans many industries such as utilities, media, banking and finance, healthcare, outsourcing, education, FMCG and transport, as well as local, state and Federal government in the public sector.

OpsCentre Highlights:

- Pragmatic, practical, cost-effective solutions
- Our staff are practitioners, not just strategists
- We have a boutique, specialist focus on continuity solutions
- On-going, Managed Service focus
- Deal directly with the business founders
- Standards-compliant solutions (BS25999, HB292/3, AS4360, AS/NZS7799 & ISO27001, BCI, DRII, APRA, Sarbanes Oxley)

We hope this report provides you with enough detail to assist with selection of technologies to support your IT Disaster Recovery implementation.

If you require any further information with business continuity, disaster recovery and crisis management projects, please do not hesitate to contact us:
